INTRODUCTION

Life2.io is an innovative NFT multiverse project that aims to provide a transformative digital experience for users by combining cutting-edge technology, immersive storytelling, and an engaging virtual environment.

As the metaverse concept gains prominence and digital life becomes increasingly intertwined with our daily routines, we see an opportunity to create a platform that connects people through a shared virtual space, transcending the boundaries of time, geography, and culture.

At the core of Life2.io lies the integration of NFTs, which serve as the building blocks of our multiverse. NFTs, or non-fungible tokens, are unique digital assets secured on the blockchain, ensuring scarcity, provenance, and ownership.

By utilizing NFTs, we enable users to own, trade, and use a wide array of characters and their traits as avatars within the multiverse. This not only empowers individuals to customize their digital presence but also fosters a vibrant, interconnected community where users can engage in social interactions, trade, and collaborate on shared experiences.

Furthermore, Life2.io aspires to be an inclusive and accessible platform, welcoming users with diverse backgrounds, interests, and skill levels.

Through our multiverse, we aim to provide an array of experiences that cater to different preferences, from exploration and social interaction to gaming and creative expression. By placing user experience at the forefront of our design, we strive to make Life2.io a digital sanctuary where individuals can escape the constraints of the physical world, forge meaningful connections, and shape their own unique digital journeys.

Life2.io is an integral part of the Globuschain Project, a visionary initiative that seeks to revolutionize the way people interact with digital worlds and assets.

GLOBUS
BLOCKCHAIN Re-DeFi-ned

This multiverse offers a diverse and expansive digital universe, spanning different eras, cultures, and dimensions. By purchasing NFTs within the [Your Project Name] multiverse, users will gain exclusive access to participate in the private sale of Globuschain's native token, GLSC (Globus Smart Coin). Moreover, investors and buyers will enjoy premium treatment and priority access to all future Globuschain products and services, along with exclusive discounts.

MULTIVERSE OVERVIEW

The Life2.io multiverse is a vast, interconnected digital landscape that encompasses a diverse range of worlds, each inspired by different eras, cultures, and mythologies. Our goal is to create an immersive and expansive environment where users can explore, engage, and interact with others, enabling them to live a fulfilling digital life in various settings and contexts.

Our multiverse is divided into several distinct realms that span across past, present, and future eras.

The past era includes worlds inspired by ancient civilizations such as Egypt, Greece, and Rome, where users can engage with characters such as gods and goddesses, legendary heroes, and mythical creatures. The present era features contemporary worlds based on modern cities, cultural landmarks, and natural wonders, allowing users to experience the diversity and richness of our current reality. The future era transports users to imaginative realms where advanced technology, extraterrestrial life, and futuristic societies coexist, opening up new possibilities and adventures.

Each world within the multiverse has been meticulously crafted to provide a unique and engaging experience, with rich narratives, stunning visuals, and diverse characters that cater to a wide range of interests and preferences. Users can choose to inhabit and explore these realms as their chosen avatars, interact with other users, embark on quests, and participate in various activities that enhance their overall digital experience.

At the heart of **Life2.io** is the principle of user empowerment and choice. We strive to provide users with the tools and opportunities to shape their digital journey according to their desires, fostering a sense of agency and autonomy.

Whether it's uncovering ancient mysteries, traversing bustling urban landscapes, or venturing into uncharted futuristic territories, our multiverse offers a plethora of experiences and adventures that cater to the diverse tastes and preferences of our user base.

NFT COLLECTION

ETERNAL GODS OF EGYPT

Experience the powerful deities of Ancient Egyptian mythology with "Eternal Gods of Egypt" on the Ethereum blockchain. Securely own and trade these unique digital assets while immersing in the rich world of Ancient Egypt.

CHARACTERS AND TRAITS

A key aspect of the **Life2.io multiverse** is the diverse range of characters and traits available as NFTs, allowing users to personalize their digital experience and enhance their sense of immersion within the various worlds.

Characters in our multiverse hail from a myriad of backgrounds, spanning different eras, cultures, and realms. These unique digital beings not only serve as avatars for users but also help bring the multiverse to life through their individual stories, attributes, and interactions.

Character traits, which can be acquired and traded as NFTs, enable users to further customize their chosen avatars, imbuing them with specific abilities, appearances, and attributes.

These traits may include distinct physical features, special skills, or unique social status within the various worlds, providing users with a greater sense of agency and expression as they navigate the multiverse

The role of characters and traits in **Life2.io** extends beyond mere customization, however. They also serve as a means of facilitating social interactions, trade, and collaboration within the multiverse. By acquiring and trading characters and traits, users can form alliances, participate in challenges, and create shared experiences with others, fostering a sense of camaraderie and belonging within the community.

NEVER stop! EXPLORING

Moreover, we are committed to continuously expanding and diversifying our character and trait offerings to cater to the evolving interests and preferences of our users. Through regular updates, collaborations with artists and creators, and the integration of user-generated content, we aim to maintain a vibrant and dynamic ecosystem where users can continually discover new characters, traits, and experiences that resonate with their unique digital identities.

ACCESSIBILITY AND AGE GROUPS

One of the fundamental principles of **Life2.io** is to create an inclusive and accessible platform that caters to users of all age groups, interests, and backgrounds. We recognize the importance of designing a multiverse that offers tailored experiences and gameplay options to ensure that every user feels welcomed and engaged, regardless of their age or skill level.

To achieve this, we have developed various stages of **gameplay**, **interaction**, and **exploration** within our **multiverse**, each designed to accommodate the needs and preferences of different age groups. For younger users, we provide age-appropriate content, activities, and challenges that promote learning, creativity, and social interaction in a safe and controlled environment. For older users, we offer more complex narratives, quests, and gameplay mechanics that appeal to their advanced skills and interests.

In addition to tailoring our content to different age groups, we have implemented stringent safety measures and community guidelines to ensure that all users can enjoy the multiverse without **harassment, bullying, or inappropriate content**. Our dedicated team of moderators and community managers actively monitor the platform to enforce these guidelines, maintain a positive and inclusive atmosphere, and provide support to users who may require assistance.

ECONOMIC SYSTEM AND TRADING

The **Life2.io** multiverse is designed to foster a thriving in-world economy where users can engage in trade, commerce, and investment using cryptocurrency. Central to this economic system is the use of NFTs, which represent unique characters, traits, and other digital assets that can be bought, sold, and traded within the multiverse.

By incorporating NFTs into our economic framework, we provide users with an opportunity to actively participate in the growth and development of the multiverse.

Users can acquire and collect characters and traits that resonate with their interests, and potentially benefit from the appreciation of these digital assets over time.

Our virtual economy also supports the trading of goods and services between users, encouraging creativity, entrepreneurship, and collaboration. Users can create and sell their own unique digital items, ranging from artwork and virtual real estate to in-game tools and resources. This not only allows users to monetize their skills and creativity but also contributes to the overall richness and diversity of the multiverse.

In addition to in-world trading, we are also committed to facilitating seamless integration with external markets and platforms, enabling users to trade their NFTs and digital assets on popular marketplaces and exchanges. This ensures that users can capitalize on their investments and benefit from the broader cryptocurrency ecosystem.

Ultimately, the Life2.io economic system aims to empower users by providing them with the tools and opportunities to actively shape their own digital experience, while also enabling them to benefit from the growth and success of the multiverse. Through a dynamic, interconnected economy built on NFTs and cryptocurrency, we strive to create a vibrant and engaging platform where users can explore, create, and prosper.

FUTURE EXPANSION AND GROWTH

As the Life2.io multiverse continues to evolve and grow, we are committed to exploring new opportunities and possibilities that will enrich the user experience, ensuring that our platform remains at the forefront of innovation and creativity in the digital space.

One of our primary objectives is the continuous expansion of our multiverse, adding new worlds, characters, and experiences that cater to the diverse interests and preferences of our users. By working closely with artists, creators, and developers from various backgrounds, we aim to integrate fresh ideas and perspectives into our platform, creating a rich tapestry of stories, visuals, and interactions that span across different eras, cultures, and dimensions.

In addition to expanding the content and scope of our multiverse, we also strive to incorporate cutting-edge technologies and features that enhance the overall user experience. This may include the integration of virtual reality, augmented reality, and AI-driven systems that allow users to engage with the multiverse in more immersive and interactive ways. By staying abreast of the latest advancements in technology, we aim to ensure that Life2.io remains an industry leader and pioneer in the rapidly evolving landscape of digital life.

Furthermore, we are committed to fostering partnerships and collaborations with other platforms, companies, and creators within the metaverse ecosystem. By establishing these connections, we can create new opportunities for cross-platform experiences, interoperability of assets, and collaborative projects that benefit both our users and the wider metaverse community.

Ultimately, our vision for the future of Life2.io is one of sustained growth, innovation, and inclusivity. We believe that by investing in the expansion of our multiverse and continuously pushing the boundaries of what is possible, we can create a digital experience that is truly unparalleled, engaging, and meaningful for all who choose to journey with us.

ROADMAP

- Launch Life2 website: Introduce the project to the public and provide essential information on the multiverse concept, NFT collections, and token utility.
- Develop and finalize the first NFT collection of Egyptian goddesses in support of women's empowerment and increasing women's participation in the workforce.
- Enable minting of Egyptian goddess's NFT collection.
- Assemble a skilled team with expertise in blockchain development, NFTs, marketing, and community management.
- Establish partnerships with influencers, content creators, and other key players within the NFT, crypto, and gaming communities to promote your project.

- Kick off marketing and promotional activities to create awareness and build community interest.
- Exclusive access to GLSC (Globus Smart Coin) private sale for NFT holders.
- Continuous integration of GLSC tokens as a utility within the multiverse and future projects.
- Premium treatment and first access to all Globuschain products and services with discounts for GLSC token holders

- Develop and finalize the second NFT collection of Egyptian gods.
- Enable minting of Egyptian gods NFT collection.
- Continuously improve marketing efforts and community engagement strategies.
- Further, expand partnerships and collaborations to strengthen the project's presence in the NFT and crypto space.
- Begin development of the Life2 Multiverse platform (Beta).
- Exclusive access to GLSC private sale for NFT holders.
- Continuous integration of GLSC tokens as a utility within the multiverse and future projects.
- Premium treatment and first access to all Globuschain products and services with discounts for GLSC token holders.

Q4 2023

- Release the Beta version of the Life2 Multiverse platform, allowing users to explore and interact with different worlds and characters.
- Collect feedback from early users of the Beta platform to identify areas for improvement and optimization.
- Develop additional features, gameplay elements, and utility for the NFT holders within the multiverse.
- Start planning for the expansion of the multiverse, incorporating new worlds, characters, and NFT collections from various eras and cultures.
- Exclusive access to GLSC private sale for NFT holders.
- Continuous integration of GLSC tokens as a utility within the multiverse and future projects.
- Premium treatment and first access to all Globuschain products and services with discounts for GLSC token holders.

Q1 2024

- Future era and interplanetary expansion
- Introduce futuristic worlds and interplanetary settings to the multiverse
- Develop new characters, traits, and NFT collections representing these future eras
- Collaborate with artists and creators to ensure a diverse and engaging experience for users
- Integrate cutting-edge technologies (e.g., VR, AR) to enhance the user experience
- Establish partnerships with other platforms and companies for cross-platform experiences and interoperability
- Exclusive access to GLSC (Globus Smart Coin) private sale for NFT holders
- Continuous integration of GLSC tokens as a utility within the multiverse and future projects
- Premium treatment and first access to all Globuschain products and services with discounts for GLSC token holders

A red button with two yellow binder clips at the top. The word "BEYOND" is written in white capital letters on the button.

BEYOND

A white button with the text "Q1 2024" in large, bold, black capital letters.

Q1 2024

- Continuous expansion and updates to the multiverse
- Regular introduction of new worlds, characters, and NFT collections
- Incorporation of user feedback and suggestions for improvements
- Ongoing marketing efforts and community engagement to maintain user interest and growth
- Exploration of new technologies and partnerships to stay ahead in the rapidly evolving digital landscape
- Exclusive access to GLSC (Globus Smart Coin) private sale for NFT holders
- Continuous integration of GLSC tokens as a utility within the multiverse and future projects
- Premium treatment and first access to all Globuschain products and services with discounts for GLSC token holders

GLOBUS

BLOCKCHAIN Re-DeFi-ned

By incorporating the GLSC token and its associated benefits into the Life2.io multiverse, we aim to create an ecosystem that is not only immersive and engaging but also rewarding for our users. Through exclusive access to the private sale and ongoing utility of the GLSC tokens within the multiverse and future projects, we strive to provide a unique and valuable experience for our dedicated community members.

DISCLAIMER

Please read the following carefully.

Below applies to everyone who reads this white paper. The LIFE2.IO White Paper (hereinafter referred to as the "White Paper") is prepared and provided on the basis at the time of its preparation, so any content contained in the White Paper may be changed or updated at any time at the discretion of [Coin Issuer or Business Progress Name] (hereinafter referred to as "Company").

If you have any doubt about the content of this White Paper, you should consult with your accountant, attorney, or another expert prior to purchasing the company-issued Globus Smart Coin (hereinafter referred to as "Globus Smart Coin").

1. The purpose of this white paper is to address summarized information and introductions about the LIFE2.IO the company is preparing. This white paper is not legally binding on the GLOBUS platform or company and does not have the nature of subscription, purchase, investment offers, and investment enforcement.
2. All information or analysis in this white paper cannot be the basis for investment decisions and in no way constitutes an investment proposal or advice. I would like to inform you that any future-planned content or data in this White Paper may be changed for any reason.

3. Companies, including directors, agents, employees, contractors, and sales partners, are not liable for all kinds of damages that may occur directly or indirectly in accordance with the information contained in this document: (1) accuracy and completeness of the contract; (2) white paper error or omission; (4) White paper unavailable. In addition, a company shall not be held solely responsible for any of the following consequences of a decision-making action using the information contained in this document: (1) revenue, revenue, liabilities and all other forms of financial damage.

4. The content of the White Paper may vary depending on the ongoing LIFE2.IO, market changes, technological advances, and changes in ICO or token regulations. However, we inform you that the Company is not obliged to notify or report future events, platforms, future plans, changes in estimates or changes within the margin of error, etc. set forth in this White Paper.

5. Information on areas such as law, tax, regulation, finance, and accounting in this white paper is not advice. Purchases of Globus Smart Coins can result in material losses, including material assets paid to buyers to purchase Globus Smart Coins. Prior to purchasing Globus Smart Coins, buyers are encouraged to consult experts in taxation, regulation, finance, and law about potential risks, revenues, and possible consequences of Globus Smart Coin trading.

6. It is entirely up to the buyer of Globus Smart Coins to determine the legal availability of overseas exchange and disposal of other tasks, such as income taxes, within his legal jurisdiction.

7. The publication and distribution of white papers is prohibited in countries where the publication and distribution of white papers is prohibited. The information in this White Paper has not been verified or authorized by any regulator, and any act against the law shall not be effective to the Company. We do not guarantee that the publication and distribution of this White Paper complies with all the regulations of the country in which it was issued.

8. All White Paper content is protected by copyright. Individual sections of the White Paper may be downloaded or printed only for personal use or other ownership disclaimers. This White Paper shall not be reproduced in whole or in part, by electronic means or other means, or amended, linked or used for public or commercial purposes without prior written permission from the Company.

Investment risk companies are notifying buyers of various types of risks, including the risk of losing money worth purchasing Globus Smart Coins. The accuracy of the information about risk or uncertainty written below is not guaranteed. The company does not guarantee the value of Globus Smart Coins. Buyers are considered to have agreed to recognize and purchase the risk as it is, with no warranty of any form of Globus Smart Coin as it is, as the sale and possession of Globus Smart Coins.

1. Blockchain risk: Blockchain system congestion can cause transactions to be processed late or invalidated. Smart contracts in charge of issuing and distributing Globus Smart Coins are based on Binance Smart Chain technology. Binance Smart Chain may have weaknesses and vulnerabilities and may cause various bugs, including bugs in which Globus Smart Coins are lost. These Binance Smart Chain problems can also cause material damage to the company and Globus Smart Coin buyers.

2. Personal information risk: User's personal information is required for the distribution and control of Globus Smart Coins in the electronic wallet of the Globus Smart Coin buyer. Therefore, if personal information is leaked, Globus Smart Coins in the buyer's electronic wallet can be leaked. Moreover, due to the buyer's personal information leakage, a third party may access the buyer's electronic wallet and steal GLOBUS coins.

3. Security risks: Like all cryptocurrencies, they are vulnerable to malicious attacks such as Ethereum 'double payment attacks' or '51% attacks'. Hackers or other malicious groups can attack the company or Globus Smart Coin with the above attack method, and successful blockchain attacks can deal with Globus Smart Coin transactions and Globus Smart Coins.

4. Electronic wallet compatibility risk: To purchase or store Globus Smart Coins, you must use an electronic wallet that is technically compatible with Globus Smart Coins. If you use a different wallet, you may not be able to access the Globus Smart Coin you purchased.

5. Inevitable risk: GLOBUS platform is still under development and the company will try to develop and maintain GLOBUS platform as stated in the white paper, but changes can occur for a variety of reasons, including legal, design, technology, and administrative regulations. Companies are exempt from liability for damages to value, loss and liquidity of Globus Smart Coins due to force outside of the Company's

control such as factors in regulatory frames, changes in licensing and taxation policies, the emergence of platforms or open sources, lack of market interest, and other similar events.

6. Risks of change in value: the company does not guarantee the value of Globus Smart Coins. The company may take relevant measures, such as changes in the value of Globus Smart Coins, incineration, and so on, due to management or platform operational reasons. The company will be exempt from any damages caused by changes in the value of Globus Smart Coins.
